

P-Cube Health AI

Predict • Prevent • Protect.

The AI-powered symptom checker and wellness platform built for the way real people experience health — fast, plain-language, and privacy-first.

Made with GAMMA

Healthcare Is Leaving People Behind

The Jargon Problem

Over **70% of patients** misunderstand their diagnosis due to complex medical terminology. Confusion leads to delayed care, poor decisions, and preventable harm.

The Speed Problem

Traditional symptom checking takes hours — between searching unreliable sources, waiting rooms, and follow-up calls. Patients need answers *now*, not tomorrow.

- ❏ Every hour of delayed clarity is an hour of unnecessary anxiety — and a missed opportunity to prevent something serious.

Meet P-Cube Health AI

A smarter, faster, and more human way to understand your health — powered by cutting-edge AI trained on real-world clinical patterns.

Plain Language

No medical jargon. Answers you actually understand, delivered in plain conversational English.

Seconds, Not Hours

AI-powered analysis delivers focused, actionable results within seconds of symptom entry.

Privacy-First

Zero data stored without explicit consent. Your health information stays yours — always.

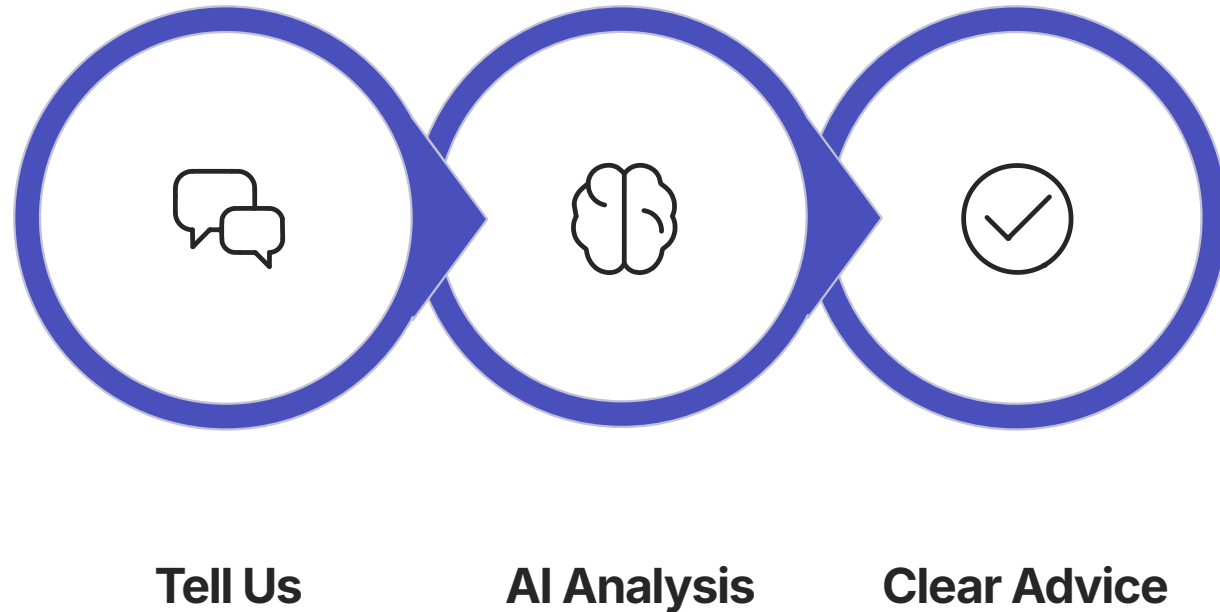

Always Current

Continuously updated with the latest real-world clinical patterns and evidence-based guidelines.

How It Works

Three simple steps from uncertainty to clarity — no appointments, no waiting, no confusion.

P-Cube's AI engine processes symptom inputs against a continuously updated knowledge base, returning prioritized, plain-language guidance — not a list of scary possibilities.

What Sets P-Cube Apart

Three Pillars of Differentiation

Privacy by Design

No data is retained without explicit user consent. HIPAA-aligned architecture from day one.

Real-Time Intelligence

Knowledge base updated continuously from real-world clinical patterns — not outdated textbooks.

Radically Focused

Built for speed and clarity. No clutter, no upsells — just the answers patients actually need.

Built for the People Who Need It Most

P-Cube targets **underserved, high-anxiety health populations** who lack consistent access to fast, reliable clinical guidance.

Senior Care

Simplified guidance for aging adults managing multiple conditions with limited digital literacy.

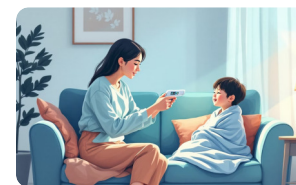

Post-Partum Care

Fast, reassuring answers for new mothers navigating postpartum recovery without constant clinical access.

Chronic Conditions

Continuous symptom monitoring and guidance for patients managing diabetes, hypertension, and more.

Parents & Caregivers

Empowering caregivers with instant, trustworthy answers when a loved one's symptoms cause concern.

Early Traction & Momentum

P-Cube is live, operational, and already building trust with real patients — with significant runway ahead.

20+

Early Patients

Active users trusting P-Cube for real health decisions today

24/7

Uptime

Round-the-clock availability — no waiting rooms, no office hours

<5s

Response Time

AI delivers focused, plain-language results in under five seconds

0

Data Sold

Zero patient data monetized or shared without explicit consent

📌 **We're at the beginning of something big.** Early adoption is the foundation — our roadmap includes partnerships with health systems, employer benefits, and insurance networks.

Join the Wellness Revolution

The future of healthcare is **proactive, personal, and powered by AI**. P-Cube Health AI is building that future — and we're looking for visionary partners to scale it.

For Investors

Seed funding to accelerate product development, clinical partnerships, and market expansion.

For Partners

Integration opportunities with health systems, payers, and employer wellness programs.
